Hello I am a journalist with Maori Television in New Zealand and am following up on the protest and confrontation that occurred near Sacred Stone Camp, Cannonball at the weekend. Native American Tribal leaders have released statements asking to meet with Governor Dalrymple over the issue and I was wondering if the Office of the Governor had responded to these requests or released any official statements in regards to what happened at the weekend. Particularly in regards to claims children were bitten by security staff attack dogs when they breached the fences at the worksite. Have any official statements besides that of the Morton County Sheriff been released since the incident. If so can I please be sent a copy. Thank you .
