I have this body armor that i bought a while back from a vendor and i want to know its worth, its an IOTV gen 2 with front and back protector, lower back and groin, yoke and collar too. they all have inserts for them and except for yoke and collar which dont take any, sadly no side carriers or deltoid protection though. What would this be worth?

i think most soft armor that you would be able to buy would be from level II to level IIIA but maybe theres a company that makes better soft armor? and also are you expecting SAPI cut or 10-12 to fit in a plate carrier or what vest are you thinking of
